Till 12 Oct 2022 the Fund operated under different investment strategy, Funds rules and different name (DSK Alternative).

Investment strategy

The Fund strives to provide protection of 100% of the value of initially invested amount while retaining the investment during the "limited period" and to the extent compatible - increase the value of investments above the protected amount by realizing the maximum possible income at low to moderate risk. The Fund invests mainly in debt financial instruments and / or bank deposits and other liquid financial assets within the meaning of Art. 38 of the ACISCIPA, incl. Derivative financial instruments - to provide exposure to indices on shares of European companies. The fund is managed actively and has no benchmark to compare its results with. The strategy envisages that, through its instruments, the Fund will participate in the possible increase in the value of the underlying asset (through the respective derivative instruments), but at the same time be protected from depreciation of the underlying asset. Detailed information on the financial instruments that can be included in the Fund's portfolio can be found in the Rules and the Prospectus.

Synthetic risk/return indicator

According to regulatory requirements (PRIIPs, Regulation (EU) No. 1286/2014) a new indicator is used when determining and presenting risk indicators of the funds managed by DSK Asset Management - "Summary risk indicator" (SRI - summary risk indicator, on a scale from 1-low to 7-high). It is determined on the basis of historical data from the fund's activity, and in the absence of sufficient history - on the basis of a suitable reference indicator or substitute, considering the market risk according to the fund's investment horizon, taking into account the credit risk, i.e. the credit quality of the instruments in which the fund invests. Additional information in the fund's Prospectus.

Realized return for period

(non-annualized until 31/1/2023)

1 year	3 years	5 years
-6,30%	-6,65%	-6,61%
