Investment strategy

The Fund's investment objectives are to protect the growth in the value of investments - the net asset value per unit calculated as of the last business day of the "limited period" to be no less than 103% of the net asset value per unit calculated as of the last business day of the "open period", and (where possible) to grow in value above the protected amount at low risk and ensure maximum liquidity of unitholders' investments during the "open period".

In order to achieve the investment objectives of DSK Stability - Eurobonds, the Fund's activities are cyclical in nature. Each investment cycle lasts approximately three (3) years and includes two main periods - "open" and "limited". Different purchase and redemption fees apply during these periods.

The Fund invests primarily in debt securities and bank deposits - securities issued or guaranteed by the Bulgarian State, another EU Member State or a third country and/or bank deposits with credit institutions domiciled in the Republic of Bulgaria, another EU Member State or a third country.
