corresponding to the target date

## Realized return for period\*

1 year	3 years	*inception
*According to the regula	atory requirements, data on th	ne fund's return are
published after the first	6 months of its activity	

## **Investment strategy**

DSK Horizon 2035 is of the Target-date funds type - funds that periodically rebalance the weight of asset classes to optimize risk and return for a predetermined time horizon. They are structured to meet the need for funds at a certain future date, hence their name. According to the current legislation, the funds are national investment funds, which is different from a collective investment scheme within the meaning of the ACISOCIUA.

G dsk Mutual Funds

The asset allocation of a target-date fund is typically designed to gradually shift to a more conservative profile so as to minimize risk when the target date approaches. Higher risk investments typically include financial instruments such as equities and equity-related investments. The lower risk part of the portfolio usually includes investments in fixed income instruments, such as bonds and cash equivalents. A globally diversified portfolio is used, consisting mainly of passive financial instruments - mainly exchange-traded funds, following indices.

## Liquidity

At a request for redemption, the customer receives the amount corresponding to the declared in the order amount after its registration with Central Depository, which is usually done by the end of the business day following the day of accepting the order. Orders can be submitted every working day until 5 p.m.;

The investor may place a redemption order in any of DSK Bank offices where the Fund is distributed, regardless which office he has purchased the units at.

#### **Profile**

The fund is designed for investors, who:

- seek to accumulate and invest assets for a specific purpose and plan to withdraw them (in whole or in part) after the "target date" (end of 2035) while maintaining high liquidity during the period;
- seek to exploit the potential of more significant market changes in the value of equity instruments when there is more time before the assets are used;
- prefer, as the "target date" approaches, to limit possible changes in value in order to rely on a more predictable amount.
