<b>1 year</b>	<b>3 years</b>	<b>*inception</b>
---------------	----------------	-------------------

\*According to the regulatory requirements, data on the fund's return are published after the first 6 months of its activity

**Investment strategy**

DSK Horizon 2040 invests in a globally diversified portfolio - mainly passive financial instruments (exchange traded funds, following indices), as well as units of mutual funds, managed by DSK Asset Management AD. The portfolio provides exposures to a wide range of asset classes, such as stocks, debt securities and money market instruments. The Fund follows the life-cycle strategy - the defined investment strategy related to the realization of the maximum possible income while assuming moderate to high risk, until the target date. As the target date approaches, the structure of the portfolio will gradually change so that the part of low-risk and liquid instruments predominates. The fund is actively managed and has no benchmark to compare its results with. Detailed information on the financial instruments that can be included in the Fund's portfolio can be found in the Rules and the Prospectus.

**Recommended investment horizon**

corresponding to the target date

**Liquidity**

At a request for redemption, the customer receives the amount corresponding to the declared in the order amount after its registration with Central Depository, which is usually done by the end of the business day following the day of accepting the order. Orders can be submitted every working day until 5 p.m.; The investor may place a redemption order in any of DSK Bank offices where the Fund is distributed, regardless which office he has purchased the units at.

**Profile**

The fund is designed for investors, who:

- seek to accumulate and invest assets for a specific purpose and plan to withdraw them (in whole or in part) after the "target date" (end of 2040) while maintaining high liquidity during the period;
- seek to exploit the potential of more significant market changes in the value of equity instruments when there is more time before the assets are used;
- prefer, as the "target date" approaches, to limit possible changes in value in order to rely on a more predictable amount.
