### Investment strategy

DSK Horizon 2040 invests in a globally diversified portfolio - mainly passive financial instruments (exchange traded funds, following indices), as well as units of mutual funds, managed by DSK Asset Management AD. The portfolio provides exposures to a wide range of asset classes, such as stocks, debt securities and money market instruments. The Fund follows the life-cycle strategy - the defined investment strategy related to the realization of the maximum possible income while assuming moderate to high risk, until the target date. As the target date approaches, the structure of the portfolio will gradually change so that the part of low-risk and liquid instruments predominates. The fund is actively managed and has no benchmark to compare its results with. Detailed information on the financial instruments that can be included in the Fund's portfolio can be found in the Rules and the Prospectus.
