**Expenses related to the management of the Fund's assets, calculated as a percentage of the average annual net asset value for the last financial year. They are reflected in the Net asset value per unit, resp. are reflected in the return for the respective period.

Investment strategy

The Fund strives to provide protection of 99% of the value of initially invested amount while retaining the investment during the "limited period" and to the extent compatible - increase the value of investments above the protected amount by realizing the maximum possible income at low to moderate risk. The Fund invests mainly in debt financial instruments and / or bank deposits and other liquid financial assets within the meaning of Art. 38 of the ACSCIPA, incl. Derivative financial instruments - to provide exposure to indices on shares of European companies. The fund is managed actively and has no benchmark to compare its results with. The strategy envisages that, through its instruments, the Fund will participate in the possible increase in the value of the underlying asset (through the respective derivative instruments), but at the same time be protected from depreciation of the underlying asset. Detailed information on the financial instruments that can be included in the Fund's portfolio can be found in the Rules and the Prospectus.

Synthetic risk/return indicator

The indicator does not fully reflect the following risks: credit, liquidity, operational, risk of derivatives and risk associated with safekeeping of assets. Other risks with possible impact on the Fund are: market, interest rate, currency, management, inflation, concentration risk and risk of related party transactions. A detailed description of the risks can be found in the Prospectus.
