Investment strategy

The Fund shall invest predominantly in:

- securities issued or guaranteed by Republic of Bulgaria, by another member state of the EU or a third state, municipal bonds, corporate bonds and/or bank deposits ;
- other liquid financial assets, incl. derivative financial instruments to provide exposure to indices on shares of German companies. The strategy envisages that the Fund should participate through these instruments in the eventual increase in the value of the underlying asset on which the relevant derivative instruments were purchased, but at the same time be prevented from decreasing the value of the underlying asset.

Detailed information about the instruments that can be included in the Fund's portfolio and its investment strategy can be found in Art. 7 - art. 16 of the Fund Rules.

Liquidity

At a request for redemption, the customer receives the amount corresponding to the declared in the order amount after its registration with Central Depository, which is usually done by the end of the business day following the day of accepting the order.

Orders can be submitted every working day until 5 p.m.;

The investor may place a redemption order in any of DSK Bank offices where the Fund is distributed, regardless which office he has purchased the units at.

Profile

DSK Stability-German equities has been designed for investors, who:

- prefer an investment that complying with an open and limited period of the Fund has a possibility to protect 99% of the originally invested amount;
- seek opportunities for greater profitability, linked to the results of index/indices based on German companies;
- seek an investment with low to moderate risk.
