Derivative financial instruments - to provide exposure to indices on shares of German companies. The fund is managed actively and has no benchmark to compare its results with. The strategy envisages that, through its instruments, the Fund will participate in the possible increase in the value of the underlying asset (through the respective derivative instruments), but at the same time be protected from depreciation of the underlying asset. Detailed information on the financial instruments that can be included in the Fund's portfolio can be found in the Rules and the Prospectus.
